Mathematical Methods in the Applied Sciences

CONTENTS

VOLUME 10, ISSUE Nos 1–5

Issue No. 1, February 1988

On the Geometric Form of Bernoulli Configurations: A. Acker 1

Transport Equations with Boundary Conditions of Reverse Reflection Type: G. Frosali, C. V. M. van der Mee and V. Protopopescu 15

Non-linear Boundary Value Problems for the Annular Membrane: New Results on Existence of Positive Solutions: H. Grabmüller and E. Novak ... 37

Reduction of Quasilinear Elliptic Equations in Cylindrical Domains with Applications: A. Mielke 51

Application of the Schwarz Function to Boundary Problems for Laplace's Equation: R. F. Millar 67

Issue No. 2, May 1988

Scattering of Elastic Waves in a Perturbed Isotropic Half Space with a Free Boundary. The Limiting Absorption Principle: Y. Dermenjian and J.-C. Guillot 87

On the Principles of Limiting Absorption and Limit Amplitude for a Class of Locally Perturbed Waveguides. Part 1: Time-independent Theory: K. Morgenröther and P. Werner 125

Uniqueness for Structural Phase Transitions in Shape Memory Alloys: K.-H. Hoffmann and Z. Songmu 145

Indexed or abstracted by Applied Mechanics Reviews, Cambridge Scientific Abstracts, Current Contents, Engineering Index, Engineering Societies Library, Mathematical Reviews and VINITI–USSR Academy of Science.

The Optimization of Directivity and Signal-to-noise Ratio of an Arbitrary Antenna Array: A. Kirsch and P. Wilde 153

The Capillary Contact Angle, II: The Inclined Plane: R. Finn and M. Shinbrot (with an Appendix by F. Milinazzo) 165

Issue No. 3, July 1988

Existence of Solutions for a Mathematical Model of Structural Phase Transitions in Shape Memory Alloys: M. Niezgódka and J. Sprekels 197

On the Thermal Stress Problem for Contacting Half-spaces with Inclusions of Other Material Involving a New Method for Computing Potentials and Singular Integrals: L. Jentsch 225

On the Construction of Global Weak Solutions in the Kynch Theory of Sedimentation: M. C. Bustos and F. Concha 245

Explicit Formula for Scalar Non-linear Conservation Laws with Boundary Condition: P. le Floch 265

A Mathematical Study of a Continuum-state Cross-bridge Model of Muscle Contraction: V. Comincioli and A. Torelli 289

The Sommerfeld Half-plane Problem Revisited, IV: Variations on a Theme of Carlson and Heins: A. E. Heins and J. M. Pond 303

On the Stationary Flows of Viscous, Incompressible and Heat-conducting Fluids: G. Łukaszewicz 329

Singularities of the Laplacian at Corners and Edges of Three-dimensional Domains and their Treatment with Finite Element Methods: E. Stephan and J. R. Whiteman 339

Issue No. 4, September 1988

On Non-stationary Navier–Stokes Flows with Vanishing Viscosity Associated with a Variational Inequality: B. A. Ton 351

Unilateral Contact with Adherence: N. Point 367

Sturm–Liouville Eigenvalue Problems on Networks: J. von Below 383

A Hilbert Space Approach to Maximum Entropy Reconstruction: M. Klaus and R. T. Smith 397

An Evolution Equation with Non-local Non-linearities: Existence, Uniqueness and Asymptotic Behaviour: P. D. Miletta 407

Boundary Value Problems for Static Maxwell's Equations: P. Urbański 427

A Dual Method to the Collocation Method: K. Ruotsalainen and J. Saranen 439

A Stability Result for Distributed Parameter Identification in Bilinear Systems: G. C. Hsiao and J. Sprekels 447

Time-periodic Solutions of Wave Equations on $\mathbb{R}^1$ and $\mathbb{R}^3$: M. W. Smiley 457
Explicitly Resolvable Equations with Functional Non-linearities: N. W. Bazley and J. Weyer 477
Global Existence for the Vlasov–Poisson/Fokker–Planck Equation in Many Dimensions, for Small Data: L. Triolo 487

Issue No. 5, November 1988

On the Radius Continuity of the Models of Polytropic Gas Spheres which Correspond to the Positive Solutions of the Generalized Emden–Fowler Equation: J. Batt and K. Pfaffelmoser 499
Initial Boundary Value Problems in One-dimensional Non-linear Thermoelasticity: R. Racke..... 517
Unique Continuation for Schrödinger Operators and for Higher Powers of the Laplacian: I. Łaba 531
On Spline Approximation for a Class of Integral Equations. I: Galerkin and Collocation Methods with Piecewise Polynomials: J. Elschner..... 543
Inversion of the Exponential X-ray Transform. I. Analysis: I. A. Hazou and D. C. Solomon 561
The Optimal Stability Estimate for Some Ill-posed Cauchy Problems for a Parabolic Equation: P. Knabner and S. Vessella..... 575
Injection of Ideal Fluid from Two Slots into a Stream: S. Stojanovic 585
On a Weakly Formulated Exterior Problem from Linear Hydrodynamics: K. Doppel and B. Schomburg 595
